

This user information presents a general review regarding the application of material handling equipment and does not substitute the existing operating instructions for specific industrial trucks and elevating platforms.

Transports with industrial trucks as well as lifting operations may be carried out by competent persons (trained in theory and practice) only.

When operated correctly, our Little Mule® products will offer the highest degree of safety, avoid damage to products and people and present a long life expectancy.

Modification of delivery condition

Design and construction of Little Mule® material handling products must not be altered by e.g. assembly of outside supplied components, bending, welding, grinding, cutting-off parts, adding boreholes, removal of safety devices or fitting of attachments.

Limitations of operation

Loading

The rated capacity (WLL) indicated on the product is the maximum load which must not be exceeded.

Transport of people

Transport of people with industrial trucks is generally forbidden!

Operation in danger zones

Lifting or transport of loads must be avoided while personnel are in the danger zone.

Do not allow people to stay on or below a raised load.

Do not place hands or feet under the raised fork frame or load on account of the imminent danger of crushing or shearing.

Inspection before starting work

- Prior to starting work, the unit must be inspected for obvious deficiencies and failures. Moreover, lowering, lifting, as well as transporting of the load should be checked. For this purpose the truck should be operated to lift, pull or push a load over a short distance and lower again.
- Furthermore check the function of the driving and parking brake as well as the key switch to protect against unauthorized use.
- Load carriage and forks must not show obvious defects (deflections, cracks or other wearing).
- Wheels and tires must not be defective.
- The hydraulic system must be in perfect order (lifting, lowering, density).
- The functional capability of the collision protective device should be checked.
- Battery charging status, fastening and cable connections of the battery as well as battery plug must be inspected for appropriate status as well as the battery cell lids (dry, clean).

For information on training please see pages 4-5!

Application advices

- Our materials handling equipment must be operated on in-plant areas only.
- Only use industrial trucks in perfect condition and with legible identity plate.
- Industrial trucks may only be operated by skilled people, who have been instructed (in theory and practice) by the responsible user.
- The travel speed must conform to local conditions.
- Industrial trucks must be operated on level ground without unevenness only.
- The operator must make sure that the load unit is in perfect condition and safely attached.
- Pallets may be transported individually only.
- Industrial trucks must not be used as car jacks.
- Industrial trucks must not be used in areas which are not illuminated sufficiently.
- Forks may not be used as levers.
- Loading of just one fork, e.g. for lifting of a machine, is strictly forbidden.
- Industrial trucks may not be operated in direct contact with foodstuffs.
- Never turn the hand lever 90° in order to stop the truck.
- The industrial truck must not be operated in explosive atmospheres (special versions on request).

Maintenance and repair

- To ensure safe operation, all materials handling equipment must be subjected to regular inspections according to the maintenance instructions provided by the manufacturer.
- Materials handling equipment, which is due for maintenance (normally at least once per year, unless adverse working conditions dictate shorter periods) or products with obvious defects may be returned to us for inspection and repair.
- Inspections and repairs must be performed by competent persons or specialist workshops that use original spare parts. Inspections and repairs have to be recorded consecutively.

Inspections

- Inspections are visual and functional and shall establish that the product has not been damaged by incorrect transport or storage. In addition check for damage, wear, corrosion or other deficiencies as well as completeness and function safety devices. Inspections are instigated by the user.
- Materials handling products have to be cleaned prior to inspection. The cleaning procedure must not cause chemical damages (e.g. no acid – embrittlement) no incorrect temperature stress by e.g. flame cleaning or possible concealment of cracks due to excessive material abrasion (sand blasting). We shall be pleased to consult you in this respect. Please submit your materials handling product for inspection in preferably clean condition. This will reduce inspection costs considerably.
- **Inspection of fork frame**
The fork frame has to be checked regularly for obvious defects, deformations and cracks as well as wear and corrosion.
- **Inspection of control handle**
The control handle must be checked regularly for obvious defects, deformations, cracks. Moreover, check screws for fixed seat.
- **Inspection of oil level**
Check oil level every six months (Oil viscosity 30 Cst at 40°C). At ambient temperature around 0°C we recommend AVILUB RSL 22.
- **Inspection of lubrication and density**
Bolts, axles and push rods should be cleaned and lubricated depending on application with e.g. Shell FD or comparable grease.
- The hydraulic unit has to be checked regularly for density.

Load diagrams for residual carrying capacities

Capacity restrictions start at a fork height h_3 of 2500 mm (EGV LE 14-45T: 2900 mm).

Hand pallet truck model HU Profi

Capacity 2500 - 3000 kg

For the professional transportation of palletised goods under demanding conditions.

Features

- Safety control handle with the functions: Lifting - driving - lowering.
- Lowering speed can be finely adjusted for sensitive lowering of the load.
- Low maintenance hydraulic with hard chromium plated piston and pressure relief valve.
- Enclosed hydraulic system with an integrated reservoir and lowering valve for finely adjusted speed when lowering.
- Frame and forks in torsion resistant, welded steel plate construction.
- Entry rollers facilitate entry into bottom boarded pallets.

Switch lever with finger formed grip, good ergonomic operation. Switch lever with three positions: Lifting - Driving - Lowering.

Strengthened control handle base prevents control handle fracture. Spring-loaded to automatically return to the upright position.

Encapsulated hydraulic system with integral tank. Piston with mechanical protection against damage. Pressure relief valve. Sensitive lowering valve for finely metered lowering speed.

Frame and forks in torsion resistant, welded steel plate construction.

Wear resistant, long life steering wheels and load rollers.

Rounded fork tips prevent damage to pallets.

Entry rollers facilitate entry into bottom boarded pallets.

Model HU Profi

Hand pallet truck model HU Special

Capacity 2000 - 2500 kg

For professional work on lorries or ramps and for the transport of long and bulky loads.

The forks for the models HU PS are available in lengths from 800 mm to 2000 mm and, depending on the fork length, with load capacities between 2000 kg and 2500 kg.

The model HU PN is suitable for the transport of particularly low pallets with flat forks, for 5 mm pallet entry height.

The model HU PB is used for the transport of small pallets. Outside fork distance 400 mm.

For the transport of brickyard pallets model HU TZ is suitable. Outside fork distance 850 mm.

Model HU Special

Hand pallet truck HU with weighing system model HU PW 20 T

Capacity 2000 kg

Fitted with four high quality load cells the hand pallet truck becomes a mobile weighing system.

The robust construction of the basic truck and high quality electronics make demanding applications possible.

Features

- The basic truck is the Little Mule® hand pallet truck HU Profi with a pallet entry height of only 85 mm.
- LED display (83plus)* has 6 characters; the characters are 20 mm in height.
- Weighing operations: Tare (gross/net), count, add, automatic return to zero.
- Accuracy is ± 0.1 % of the end value.
- The readings start at 1.0 kg.
- The battery capacity provides for around 28 operating hours.
- The weighing system is calibrated at the factory.

*Made by RHEWA

Option

- Stainless steel version
- Special calibration of the measured value (Multi-range scale).
- Measuring range up to 2500 kg.
- With printer
- Change setting of partition.

Scope of delivery

Battery and battery charger included.

LED display 83plus

Option: printer

Model HU PW 20T

Hand pallet truck HU with weighing system model HU PW 20 TA

Capacity 2000 kg

Robust design for simple weighing jobs.

Features

- The basic truck is the Little Mule® hand pallet truck HU Profi with a pallet entry height of only 85 mm.
- Measuring range from 0 up to 2000 kg in 1 kg steps.
- The illuminated LCD display has 6 characters; the characters are 30 mm in height.
- Weighing operations: Tare (gross/net), count, add, automatic return to zero.
- Accuracy is ± 0.1 % of the end value.
- The readings start at 1 kg.
- The battery capacity provides for around 25 operating hours.
- The weighing system is calibrated at the factory.
- The system is designed for simple weighing jobs, e.g. calculation of total weights.

Scope of delivery

Integrated battery and external battery charger.

Easy to read, tiltable LCD display

For applications in corrosive surroundings e.g., all sorts of salts, please contact us.

Stainless steel hand pallet truck model HU PE

Capacity 2000 kg

For the professional transportation of palletised goods in corrosive areas.

Features

- Safety operating lever with the functions: Lifting - driving - lowering.
- Lowering speed can be finely adjusted for sensitive lowering of the load.
- Low maintenance hydraulic unit with galvanized and blue chromated pump.
- Enclosed hydraulic system with an integrated reservoir and lowering valve for finely adjusted speed when lowering.
- Frame and forks of torsion resistant stainless steel construction.
- Entry rollers facilitate entry into bottom boarded pallets.
- Connecting rods and roller yokes from stainless steel.
- Maintenance free deep groove ball bearing (2 RS).
- Fork length 1150 mm.
- Polyurethane steering wheels and polyamide load rollers offer high chemical resistance.

Model HU PE

Container tilter model HU BN 10 M

Capacity 1000 kg

The container tilter: For the transportation, lifting and tilting of box pallets, bins or metal lattice boxes.

Features

- The forks can be tilted to a 90° angle for an ergonomic working position and easy access to the goods in the boxes.
- The operating hand lever can be turned and locked out of the working area to allow easy access to the goods.
- The unit is equipped with secure park brakes.
- Variable working heights between 750 and 950 mm. For maximum flexibility, the working height can also be adjusted while in the tilted position.
- For optimal positioning, the lifting and tilting operations are carried out independently to each other.

Scissor pallet truck with manual-hydraulic lift model HU HS 10A

Capacity 1000 kg,
fork height max. 800 mm

A combination of hand pallet truck and elevating platform for the transport and raising of palletised loads to various departments.

Features

- Safety control handle with the functions: Quick-lift - lifting - lowering.
- Lowering speed can be finely metered for sensitive lowering of the load.
- One-stage hydraulic.
- Quick-lift for loads up to 250 kg.
- Overload protection by pressure relief valve.
- Safety supports guarantee sure standing when the forks are raised.
- Low noise and smooth running with standard tyres: steer rollers and load rollers - polyurethane.
- Additional tilting protection for the load rollers.

Model HU HS 10A

Scissor pallet truck with electric-hydraulic lift model HU ES 10 A

Capacity 1000 kg,
fork height max. 800 mm

The model HU ES 10 A increases the usefulness of the HU HS 10 A by saving operating time for demanding applications with frequent lifting and lowering operations.

Features

- Ergonomic control button for the hydraulic unit fitted in the handle.
- In case of a battery failure the manual use of lifting and lowering is still guaranteed.
- Quick electric-hydraulic lifting of the load, pressure relief valve protects against overloading.
- Low noise and smooth running with standard tyres: steer rollers - solid rubber, load rollers - polyamide.
- Additional tilting protection for the load rollers.

Scope of delivery

Battery and battery charger included.

Model HU ES 10 A

Electric pallet lift truck model EGU EL

Capacity 1400 kg

Ideal unit for working on ramps or taking along on a lorry.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Length incl. apron 435 mm.
- Reliable impulse control for stepless regulation of driving speed.
- Battery size depends on the type of application.

Scope of delivery

Battery and battery charger included.

! Fork length 1000 mm and fork width 680 mm on request.

Model EGU EL

Electric pallet lift trucks model EGU ES

Capacity 1500 - 3000 kg

For high demands and quick turnaround in continuous applications, also suitable for loading/unloading lorries and ramp work.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Spring-mounted central drive unit with robust 1.2 kW.
- Hoist motor performance 2.6 kW, pressure relief valve for safety.
- Reliable impulse control for stepless regulation of driving speed.
- Battery size depends on the type of application.

Option

- Drivers platform
- Zinc-plated version
- Fork lengths from 800 - 2400 mm.
- Spring-mounted central drive unit with robust 1.7 kW motor.

Battery and battery charger are to be ordered separately.

Model EGU ES

Manual drive stackers with manual-hydraulic lift model HV TH

Capacity 1000 kg,
max. overall fork 1600 mm

Ideal for the occasional, internal application of
stacking and transporting of palletised goods.

Features

- Ergonomically designed handle incorporating Lift - neutral - lower functions.
- Lowering speed can be finely metered for sensitive lowering of the load.
- Powerful hydraulic pump and cylinder, providing a quick-lift feature, protected via a pressure relief valve.
- Welded mast construction made from precision profiles.
- Adjustment of the unit through a locking device.
- Max. overall fork height 900 mm and 1600 mm.
- Robust chassis each having two steering wheels and two load rollers; retention by parking device.

Model HV TH

Manual drive stackers with electric-hydraulic lift model HV TM

Capacity 1000 - 1500 kg,
fork height max. 3500 mm

Suitable for occasional to medium applications of
stacking and transporting palletised loads, also in
confined areas.

Features

- Easy to operate via tie-rod guides to both steer wheels.
- Compact electric-hydraulic lifting device and over-load protection.
- Finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- Robust frame with two load and two steer rollers, retention is by parking device.

Scope of delivery

Battery and battery charger included.

Model HV TM

Electric pedestrian stackers model EGV TG

Capacity 1000 - 1200 kg,
fork height max. 3500 mm

Ideal for stacking and transportation of palletised goods within a warehouse environment for short haul and medium work load applications.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Reliable impulse control for stepless regulation of drive speed.
- Compact electric-hydraulic lifting device and over-load protection.
- Finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- Solid frame with one drive wheel and two load and two guide rollers.
- Battery size depends on the type of application.

Scope of delivery

Battery and battery charger included.

Model EGV TG

Electric pedestrian stackers model EGV LE

Capacity 1200 - 1600 kg,
fork height max. 4500 mm

Ideal for stacking and transportation of palletised loads within a warehouse environment for long haul and high work load applications.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Reliable impulse control for stepless regulation of drive speed.
- Compact electric-hydraulic lifting device and overload protection.
- Finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- Solid frame with one drive wheel and two load and two guide rollers.
- Battery size depends on the type of application.

Battery and battery charger are to be ordered separately.

Model EGV LE

Electric pedestrian stackers model EGV LV

Capacity 1200 - 2000 kg,
fork height max. 4500 mm

Ideal for stacking and transportation of palletised loads within a warehouse environment for long haul and high work load applications.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Reliable impulse control for stepless regulation of drive speed.
- Compact electric-hydraulic lifting device and overload protection.
- Finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- Excellent all round vision when manoeuvring and positioning the load due to high visibility mast.
- Low overall height and high maximal fork height with triplex mast.
- Solid frame with one drive wheel, two support wheels and four load rollers.
- Battery size depends on the type of application.

**Battery and battery charger are
to be ordered separately.**

Model EGV LV

Electric pedestrian stackers with initial lift model EGI LD

Capacity 1200 - 1500 kg,
fork height max. 3500 mm

Ideal for operation on inclines and ramps within a warehouse environment, for stacking and transporting palletised loads in longer haul and high work load applications.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is not longer in the users hand.
- Reliable impulse control for stepless regulation of drive speed.
- Compact electric-hydraulic lifting device and over-load protection.
- Finely metered lowering of the load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- For double deck loading in demanding conditions on inclines and ramps.
- Solid frame with one drive wheel, two support wheels and four load rollers.
- Battery size depends on the type of application.

**Battery and battery charger are
to be ordered separately.**

Model EGI LD

Electric pedestrian four-way stackers model EGY LW

Capacity 1200 - 1500 kg,
fork height max. 3500 mm

Ideal for transporting and stacking long goods under demanding conditions.

Features

- Multifunctional control handle for easy handling.
The electric pallet lift truck will automatically be slowed down if the control handle is no longer in the users hand.
- Reliable impulse control for stepless regulation of drive speed.
- Compact electric-hydraulic lifting device and over-load protection.
- Finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Compact electric-hydraulic lifting device, over-load protection and finely metered lowering of load through pressure relief valve and adjustable lowering valve.
- Mast welded from precision profiles, fork carriage with maintenance free guide rollers.
- Takes maximal advantage of available storage space by using four-way technique, load wheels can be hydraulically rotated 90°.
- Solid frame with one drive wheel and two load and two guide rollers.
- Battery size depends on the type of application.

Battery and battery charger are to be ordered separately.

Model EGI LW

Mobile elevating work bench model HT

Capacity 800 kg,
platform height max. 1475 mm

The elevating work bench is used in manufacturing and assembly processes for positioning and lifting tools or other heavy loads.

Features

- Solid frame with two load and two steer rollers.
- Steer roller with locking device for safe parking of the elevating platform lift.
- Triplex mast for high lifting height 1450 mm.
- Large stroke for every pump action by hydraulic unit with double-acting hand pump protected by a pressure relief valve.
- Manual hydraulic lift.

Option

Electric-hydraulic lift

Scope of delivery

Battery and battery charger included.

Model HT

Scissor elevating platform, mobile model HF/S

Capacity 150 - 1000 kg,
platform height max. 1000 mm

For the independant lifting and supplying of light up to medium loads within a warehouse environment. Furthermore the relation between price and service of the product is another vital aspect to mention.

An elevating platform for lifting and supplying goods independent of the location.

Features

- Stepless manual lever lowering.
- Hydraulic lifting with foot pedal.
- High safety due to pressure relief and lowering valve.
- Single scissor
- Frame and platform are free of torsion.
- Steering and fixed rollers with service-free roller bearings. One steer roller can be locked in position for parking.
- According to EN 1570, prEN 1757-4.

Technical data model HF/S

Model HF/S

Scissor elevating platform, mobile model HF/S

Capacity 500 - 1250 kg,
platform height max. 1050 mm

For lifting and supplying goods independent of the location.

Features

- Manual hydraulic system with pedal or electric hydraulic system with dead man function - a main current connection is not required.
- High safety due to pressure relief and lowering valve.
- Robust single scissor construction, above 300 kg with solid steer scissor.
- Pivoting platform with mechanic adjustment for safe maintenance work.
- Compact design with low OAH.
- Steering and fixed rollers with service-free roller bearings. One steer roller can be locked in position for parking.
- According to EN 1570 and machinery directive 89/392.

Scope of delivery

Models with electric-hydraulic pump are supplied complete with battery and charger.

Model HF/S

**Scissor elevating platform,
mobile
model HF/D**

Capacity 125 - 800 kg,
platform height max. 1900 mm

Same design as model range HF/S, however, with
double vertical scissor.

Features

- According to EN 1570 and machinery directive 89/392.

Scope of delivery

Models with electric/hydraulic pump are supplied
complete with battery and charger.
